

Education and Employability

Providing quality education and top training programs to underprivileged groups

Genpact's passionate volunteers are continuously working toward creating a better future for disadvantaged groups. Through the 'adopt a school' program, our volunteers have adopted schools in the Philippines, Guatemala, and India – where they regularly interact with children and help them excel. We also focus on providing vocational training programs in partnership with various non-profits, with the aim of helping individuals better employment opportunities, thereby enabling local communities to grow stronger every day.

Some activities include:

- Providing primary education to disadvantaged children globally
- Empowering youth through skill-building in India, China, and Philippines
- Supporting 2,000+ underprivileged girls, children, and youth with higher education and vocational skills in India
- \$2500 raised to ensure shelter and education for needy school children in the US

There's more:

FILINVEST ANNEX ELEMENTARY SCHOOL IN PHILIPPINES

We partner with the school to improve the existing facilities and build a better learning environment for 800+ students

MOUNT CARMELO SCHOOL IN GUATEMALA

We work closely with the school to improve the existing infrastructure and also provide career counselling support to 300+ students
